

## LEVER LA LA LA

In a first class lever, the fulcrum is between  
The force and the mighty load  
Which might be water or a kid named Jean  
You use a first class lever to paddle a canoe  
A seesaw or a scissors or the  
Shoehorn in your shoe

### Chorus:

**LA LA LEVER**

**La-la-la-la-la-LEVER**

**Your load is so heavy and your fulcrum is fixed**

**But LA LA LEVER**

**La-la-la-la-la-LEVER**

**If I apply some force today**

**We can lever all your troubles away**

*That's not all the levers we've got  
Let's give the second class lever a shot*

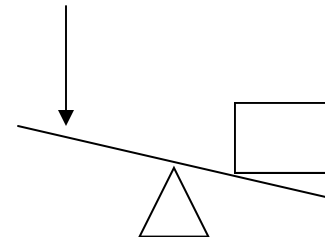

In a second class lever the force is at one end  
The fulcrum's at the other end  
The load is in the middle but the bar won't bend  
A door is a second class lever, and a wheelbarrow's one too  
If you like to use a nutcracker  
Try lever number two!

### Chorus

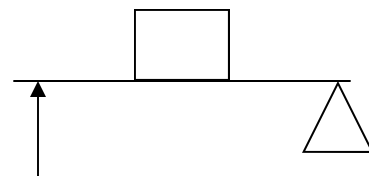

*That's not all the levers we've got  
Let's give the third class lever a shot*

In a third class lever it's the fulcrum, then the force  
Then the load on the other side  
Which might be an apple or a stick or a horse  
Your arms are third class levers, your legs are levers too  
And shovels, slings, and spoons  
When you use them to fling food.

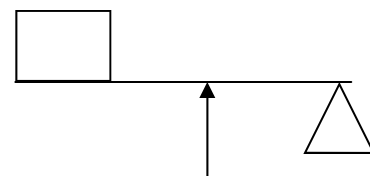

### Chorus

First Class Lever

Second Class Lever

Third Class Lever
